

PUAFER006 LEAD AN

EMERGENCY CONTROL ORGANISATION (ECO)

This training program is designed for people who lead or wish to lead an emergency response team within an organisation.

The emergency response team leader is responsible for setting up, maintaining and developing teams and their equipment.

A pre-requisite for this unit of competency is the PUAFER005 Operate as part of an emergency control organisation

Without having attained this essential unit, you will not be able to enrol in this unit of competency.

Skills and Knowledge learnt include:

- Preparing for an emergency in a facility
- Taking appropriate actions in an emergency
- Undertaking pre-emergency planning
- Concluding an emergency

The training program is a “hands on” training and assessment session, with the participant moving around the training facility or around through own premises planning for an emergency, undertaking an evacuation and conducting a post evacuation debrief.

An evacuation will require a reasonable amount of walking, both indoors and outdoors, and thus sensible clothing suited for an evacuation should be worn.

To be eligible to enrol in this training program, participants must be over 18 years of age and have the support of their employer.

Course Duration: This course is delivered over a single day, with all training and theory assessment being delivered within that day. The participant is required to return to their workplace and obtain evidence of their competency. This evidence of competency should require no more than ten hours to accumulate and it is expected that the participant will be able to email this to their assessor within a month of the training session.

Participants are expected to bring their own pen and paper for taking any additional notes. This unit of competency is nationally recognised and can only be delivered by a Registered Training Organisation (RTO) that complies with the governing standards of quality control and quality training and assessment.

Assessment is based on competency i.e. ability to perform tasks to a required standard. Assessment is conducted through a combination of theory paper and practical demonstration.
