

FIRE SAFETY TRAINING

GENERAL STAFF

This training program is designed for general staff members who may or may not be part of an emergency control organisation within a building or health care facility. It provides the basic information on hazard identification and prevention, initial response to emergency situations and methods to contain the emergency using appropriate measures.

These units are in accordance with the NSW Health Policy Directives for fire safety in health care facilities.

General staff training (all employees)

- PUAFER001B – Identify, prevent and report potential facility emergency situations
- PUAFER004B – Respond to facility emergencies
- PUAFER008B – Confine small emergencies in a facility

Course Content:

- Australian Standard 3745-2010
- Emergency planning committee
- Emergency control organisation
